

Dissemination: Good practices' case studies as well as videos will be developed and used for further promotion of the ecological conversion of public spaces among sector's stakeholders and the general public. Public events will also be organised in Romania, Germany and Italy.

Online course: The compass project core activity relies in the implementation of a 80 hours online training course providing trainees with interdisciplinary competences and the opportunity to develop concrete project ideas for the ecological and participative conversion of public spaces together with local authorities.

Context Analysis: Compass partnership is developing research on the conversion sector to produce a report on the development trends, occupational perspectives and training and education available in the field of ecological conversion, in particular of public spaces.

Activities

To promote good practices in the field of ecological conversion of public spaces.

Co-funded by the Erasmus+ Programme of the European Union

Objectives

- To train about 50 unemployed professionals in the field of participative and ecological conversion of public spaces;
- To create a new professional curriculum "sustainable conversion consultant" and to implement its related training course;
- To establish connections and business partnerships between local authorities, private companies, professionals and local communities;
- To support the mainstreaming of open educational resources for lifelong learning;

The Compass project wants to contribute to building fair, socially and environmentally sustainable societies through the development of a new professional curriculum and online training course in the field of ecological conversion of public spaces. The project, based in 5 European countries (Italy, Bulgaria, Germany, Croatia and Romania), includes activities of context analysis, dialogue with stakeholders, professional training and collaborative project ideas' development with local authorities to enhance participative and ecological conversion processes throughout Europe.

The project in a nutshell

September 2015 / August 2017
